No.299, Bayi Road, Wuhan University, Wuhan 430072, China

EDUCATION

Wuhan University	09/2017—now
Bachelor of Engineering, Computer Science and Technology, School of Computer Science	Expected 2021
General GPA: Age:20	
Grade: Junior English Level:CET-4: 632 TOEFL:103	

RESEARCH EXPERIENCE

School of Computer Science, Wuhan University	02/2018--02/2019
---	-------------------------

Project: Human Traffic Monitoring Based on Deep Learning and Video Analysis (team leader)

Funded by *University Students' Innovation and Entrepreneurship Contest Program*

Advisor: Associate Professor **Qin ZOU** (PI)

- Collect numerical sample data and use TensorFlow API to construct a CNN deep learning model.
- Input collected sample data into CNN for feature extraction, and after pooling procedure, input features extracted by convolutional layer into RNN and output the results of classifier, train and improve the model with big data.

School of Computer Science, Wuhan University	12/2019--06/2020
---	-------------------------

RDSGAN: Rank-based Distant Supervision Relation Extraction with Generative Adversarial Framework (in submission)

Advisor: Professor **Min Peng** (PI)

- A novel generative neural framework which learns the distribution of true positive instances and automatically generates massive valid instances to provide a clean dataset for distant supervision relation extraction.
- Firstly, we train the discriminator to learn the distribution of true positive instances excluding false positive instances via adversarial training, then the generator is trained to generate instances more similar to real ones.
- Secondly, we rank all the instances in a sentence bag and select instances conforming to the distribution of true positive instances via rank-based distant supervision, which addresses the false positive problem.

PROGRAM EXPERIENCE

Harvard University Summer School Program	Boston, America
---	------------------------

Summer School Student	07/2018--08/2018
------------------------------	-------------------------

- Learn “Developing Cross-Platform Mobile Apps With Xamarin” for 36 units.
- Successfully complete individual programming project using both C# and Xamarin to create an app for the usage of local transportation, give the final presentation of my work and get an A.

Shenzhen Sunline Tech Co., LTD Internship	Shenzhen, China
--	------------------------

Intern Software Engineer	07/2018--08/2018
---------------------------------	-------------------------

- Learn knowledge about knowledge graph, data visualization, Louvain Algorithm and web crawler.
- Use Python to crawl data of a big community and the relationships between each two people, organize all the data into a form of undirected graph using Louvain Algorithm.
- Use Networkx Python and neo4j to visualize relationships among bank staff, use PageRank Algorithm to find and output the data of the most important persons in the big community.

HONORS & SCHOLARSHIPS

<i>Excellent Student Scholarship (Rank: 25/367)</i> , Wuhan University	07/2018
<i>Excellent Student Scholarship (Rank: 18/367)</i> , Wuhan University	10/2019
<i>National Second Prize (Top 5% of 42992 teams)</i> , China Undergraduate Mathematical Contest in Modeling	11/2019
<i>First Prize (Top 3%)</i> , Translation & Interpreting Contest of Hubei Province	04/2020
<i>Honorable Mention</i> , ICM of Consortium for Mathematics and Its Applications	04/2020

PROFICIENCY

Deep Learning Framework: Pytorch / Tensorflow / Keras
Programming Language: Python, C++, C, C#, MATLAB, Lingo
