No.299, Bayi Road, Wuhan University, Wuhan 430072, China

<https://www.frankgqluo.xyz/>

## EDUCATION

### Wuhan University

Wuhan, China

B.S in Computer Science and Technology, School of Computer Science    Sept. 2017—Jun. 2021(expected)

- Cumulative GPA: 3.74/4.00 (89.1/100)    3.84/4.00 (WES)

- Prize: **National Second Prize** (Top 5% of 42992 teams) in China Undergraduate Mathematical Contest in Modeling

### Harvard University

Boston, USA

Summer School Student

July 2018—Aug. 2018

- Course: “Developing Cross-Platform Mobile Apps With Xamarin” (36 academic hours)

GPA: **4.00/4.00**

## PUBLICATIONS

**Guoqing Luo**, Jiaxin Pan, Min Peng, “RDSGAN: Rank-based Distant Supervision Relation Extraction with Generative Adversarial Framework” [[Arxiv](#)] (submitted to NAACL 2021)

Guoshun Nan, Zhijiang Guo, **Guoqing Luo**, Wei Lu, “Learning Latent Structures for Document-Level Relation Extraction” (submitted to TKDE)

## RESEARCH EXPERIENCE

### StatNLP, Singapore, Singapore University of Technology and Design

Jun. 2020—Present

#### Dynamic Latent Structures for Real-Time Dialogue-Based Relation Extraction

Advisor: Associate Professor [Wei LU](#)

- Extracted dynamic latent structure based on Hard Kumaraswamy Distribution; Employed a relaxed form of  $L_0$  regularization to promote latent beliefs; Applied EvolveGCN to capture the dynamism of a graph sequence.
- Pre-processed dialogues such as TV Series dialogues into windows of turns to deal with temporal drift.

### WHU NLP Lab, Wuhan University

Dec. 2019—Jun. 2020

#### RDSGAN: Rank-based Distant Supervision Relation Extraction with Generative Adversarial Framework

Advisor: Professor [Min PENG](#)

- Proposed a novel generative neural framework which 1) learns the distribution of true positive instances and 2) automatically generates valid instances to provide a clean dataset for distant supervision relation extraction.
- Trained the discriminator to learn the distribution of true positive instances, excluding false positive instances via adversarial training, then the generator was trained to generate instances more similar to real ones.
- Ranked all the instances in a sentence bag; Selected instances conforming to the distribution of true positive instances via rank-based distant supervision addressing the false positive problem.

### School of Computer Science, Wuhan University

Feb. 2018—Feb. 2019

#### Project: Human Traffic Monitoring Based on Deep Learning and Video Analysis (Team Leader)

Funded by *University Students' Innovation and Entrepreneurship Contest Program*

Advisor: Associate Professor [Qin ZOU](#)

- Collected numerical sample data and used TensorFlow API to construct a CNN deep learning model.
- Input collected samples into CNN for feature extraction; After pooling procedures, input features extracted by convolutional layer into RNN; Output the results of classifier, trained and improved the model with big data.

## PROGRAM EXPERIENCE

### Shenzhen Sunline Tech Co., LTD Internship

Shenzhen, China

#### Intern Software Engineer

Jul. 2019—Aug. 2019

- Learn knowledge about knowledge graph, data visualization, Louvain Algorithm and web crawler.
- Use Python to crawl data of a big community and the relationships between each two people, organize all the data into a form of undirected graph using Louvain Algorithm.
- Use Networkx Python and neo4j to visualize relationships among bank staff, use PageRank Algorithm to find and output the data of the most important persons in the big community.

**International Volunteer Program, Nil Manel Foundation****Balapitiya, Sri Lanka****Volunteer Team Leader****Feb. 2019—Feb. 2019**

- Taught Orphans in the kindergarten about painting, learning new words and writing for 8 hours every day.
- Took care of elephant orphans and saved and collected sea turtle eggs at night every day.

**Cambridge University Winter Development Program****Cambridge, UK****Student Leader****Jan. 2018—Feb. 2018**

- Learnt Relevant Course: Psychology and Economics, Understanding of modern marketing communications, Introduction to EU Law and Brexit, Understanding of Creativity, Liszt at the Opera, etc
- Gave final group presentation “Introduction to Reincarnation” and rank 2<sup>nd</sup> of all 8 teams.

**AWARDS & SCHOLARSHIPS**

---

<i>Excellent Student Scholarship (Rank: 30/367), Wuhan University</i>	Oct. 2020
<i>S. I. Komarova Scholarship for academic excellence, Valeon Scholarship program</i>	July 2020
<i>Honorable Mention, ICM of Consortium for Mathematics and Its Applications</i>	Apr. 2020
<i>First Prize (Top 3%), Translation &amp; Interpreting Contest of Hubei Province</i>	Apr. 2020
<i>National Second Prize (Top 5% of 42992 teams), China Undergraduate Mathematical Contest in Modeling</i>	Nov. 2019
<i>Excellent Student Scholarship (Rank: 18/367), Wuhan University</i>	Oct. 2019
<i>Excellent Student Scholarship (Rank: 25/367), Wuhan University</i>	Sept. 2018

**PROFICIENCY****Language: Mandarin, English****Programming: Python, C++, C, C#, MATLAB, Lingo****English Level: TOEFL: 103 (Speaking 25) GRE: 321+3.5****Deep Learning Framework: Pytorch / Keras**
