Mobile Phone: (+86)153-0862-7530 E-mail: frankluo007@gmail.com

No.299, Bayi Road, Wuhan University, Wuhan 430072, China

EDUCATION

Wuhan University

Wuhan, China

B.S in Computer Science and Technology, School of Computer Science

09/2017—06/2021(expected)

- Cumulative GPA:

- Prize: **National Second Prize** (Top 5% of 42992 teams) in China Undergraduate Mathematical Contest in Modeling

- Relevant Course: Operating Systems, Principle of Compilers, Pattern Recognition, Computer Graphics, Introduction to Artificial Intelligence, Computer Organization, Computer Networks, Data Structure, etc

Harvard University

Boston, USA

Summer School Student

07/2018—08/2018

- Course: “Developing Cross-Platform Mobile Apps With Xamarin” for 36 academic hours.

GPA: 4.00/4.00

- Completed individual programming project using both C# and Xamarin to create an app for local transportation

PREPRINTS

Guoqing Luo, Jiaxin Pan, Min Peng, “*RDSGAN: Rank-based Distant Supervision Relation Extraction with Generative Adversarial Framework*” [[Arxiv](#)]

RESEARCH EXPERIENCE

StatNLP, Singapore, Singapore University of Technology and Design

06/2020—Present

Dynamic Latent Structures for Real-Time Dialogue-Based Relation Extraction (ongoing)

Advisor: Associate Professor [Wei LU](#)

- Extract dynamic latent structure based on Hard Kumaraswamy Distribution; Employ a relaxed form of L_0 regularization to promote compact latent beliefs.
- Pre-process dialogues such as TV Series dialogues into windows of turns to deal with temporal drift.

WHU NLP Lab, Wuhan University

12/2019—06/2020

RDSGAN: Rank-based Distant Supervision Relation Extraction with Generative Adversarial Framework

Advisor: Professor [Min PENG](#)

- Proposed a novel generative neural framework which 1) learns the distribution of true positive instances and 2) automatically generates valid instances to provide a clean dataset for distant supervision relation extraction.
- Trained the discriminator to learn the distribution of true positive instances, excluding false positive instances via adversarial training, then the generator was trained to generate instances more similar to real ones.
- Ranked all the instances in a sentence bag; Selected instances conforming to the distribution of true positive instances via rank-based distant supervision addressing the false positive problem.

School of Computer Science, Wuhan University

02/2018—02/2019

Project: Human Traffic Monitoring Based on Deep Learning and Video Analysis (Team Leader)

Funded by *University Students' Innovation and Entrepreneurship Contest Program*

Advisor: Associate Professor [Qin ZOU](#)

- Collected numerical sample data and used TensorFlow API to construct a CNN deep learning model.
- Input collected sample data into CNN for feature extraction; After the pooling procedure, input features extracted by convolutional layer into RNN; Output the results of classifier, trained and improved the model with big data.

PROGRAM EXPERIENCE

Shenzhen Sunline Tech Co., LTD Internship

Shenzhen, China

Intern Software Engineer

07/2019—08/2019

- Learn knowledge about knowledge graph, data visualization, Louvain Algorithm and web crawler.
- Use Python to crawl data of a big community and the relationships between each two people, organize all the data into a form of undirected graph using Louvain Algorithm.
- Use Networkx Python and neo4j to visualize relationships among bank staff, use PageRank Algorithm to find and output the data of the most important persons in the big community.

- Learnt Relevant Course: Psychology and Economics, Understanding of modern marketing communications, Introduction to EU Law and Brexit, Understanding of Creativity, etc
- Gave final group presentation “Introduction to Reincarnation” and rank 2nd of all 8 teams.

AWARDS & SCHOLARSHIPS

<i>Excellent Student Scholarship (Rank: 30/367)</i> , Wuhan University	10/2020
<i>S. I. Komarova Scholarship for academic excellence</i> , Valeon Scholarship program	07/2020
<i>Honorable Mention</i> , ICM of Consortium for Mathematics and Its Applications	04/2020
<i>First Prize (Top 3%)</i> , Translation & Interpreting Contest of Hubei Province	04/2020
<i>National Second Prize (Top 5% of 42992 teams)</i> , China Undergraduate Mathematical Contest in Modeling	11/2019
<i>Excellent Student Scholarship (Rank: 18/367)</i> , Wuhan University	10/2019
<i>Excellent Student Scholarship (Rank: 25/367)</i> , Wuhan University	09/2018

PROFICIENCY

Language: Mandarin, English

Programming: Python, C++, C, C#, MATLAB, Lingo

English Level: TOEFL: 103 GRE: 321+3.5 IELTS: 6.5

Deep Learning Framework: Pytorch / Keras
